

PondMagic

ROCK CLEANER

Restore rocks to their natural state

- ⚡ Returns dirty, stained rocks to their natural beauty in seconds
- ⚡ Uses oxygen-powered technology to clean surfaces below the water line
- ⚡ Safe for all aquatic life

Imagine if you could instantly restore every surface of your pond to look like new—now you can with SuperNatural's PondMagic. Using the power of oxygen alone, PondMagic effectively cleans rocks, liners, waterfalls, streams, and bubblers. Just turn off the pump, apply PondMagic to the desired surfaces, let it sit briefly, and watch as it bubbles away unsightly debris, leaving your pond fresh and clean.

Apply PondMagic as needed, ensuring complete coverage of the affected area for best results. Immediate oxygenation will occur, restoring the area to its natural state. For treating waterfall rocks or fountain surfaces, turn off the pump before application. When applying directly in the pond, gently scatter the product evenly across the pond's surface over the affected rocks.
