

FishShield

POND FISH TREATMENT

Unique and patented concentrated treatment

- ⚡ Increases fish growth
- ⚡ Improves survival rates
- ⚡ Increases feed conversion
- ⚡ Safe for all aquatic life

FishShield promotes the health and vibrancy of pond fish with regular treatment. This unique, patented, highly concentrated fish treatment is designed to enhance fish size and health, improve survival rates, and optimize feed conversion, allowing for less feeding and faster growth.

Apply the recommended amount of FishShield based on the total water volume in your pond. Use FishShield when introducing new fish or as a routine treatment to maintain a healthy environment for aquatic life and protect fish from pathogens.

Apply once a week or as needed, and ensure aeration is running continuously during application. Avoid using other water treatments alongside FishShield applications.
